To anyone whom it may concern

Thanks, we are company doing system integration, what means we do projects oriented business. Attached is our partial References List, or visit links below:

- <http://www.aspekt.rs/index.html>
- <http://www.aspektdoo.com/index.html>

We do project first, and if Investor (Customer) accepts all, then we do purchasing, according to what we have offered. During project process for us, most important is to have good choice of equipment we are specialized for:

- For vehicles access control and
- For pedestrians access control

In general, below is equipment we are using for our projects. So, there is a sense to keep us informed, related to all below, or similar units you are producing, only if we will have:

- Brochures, Detailed technical sheets (and good images, videos if any)
- Prices, of course, for any product you promote – offer
- Advantage is CE Certificate for any product you promoting – offering - purpose

According to what we receive, we update our Vendors (suppliers) List we are using to make projects.

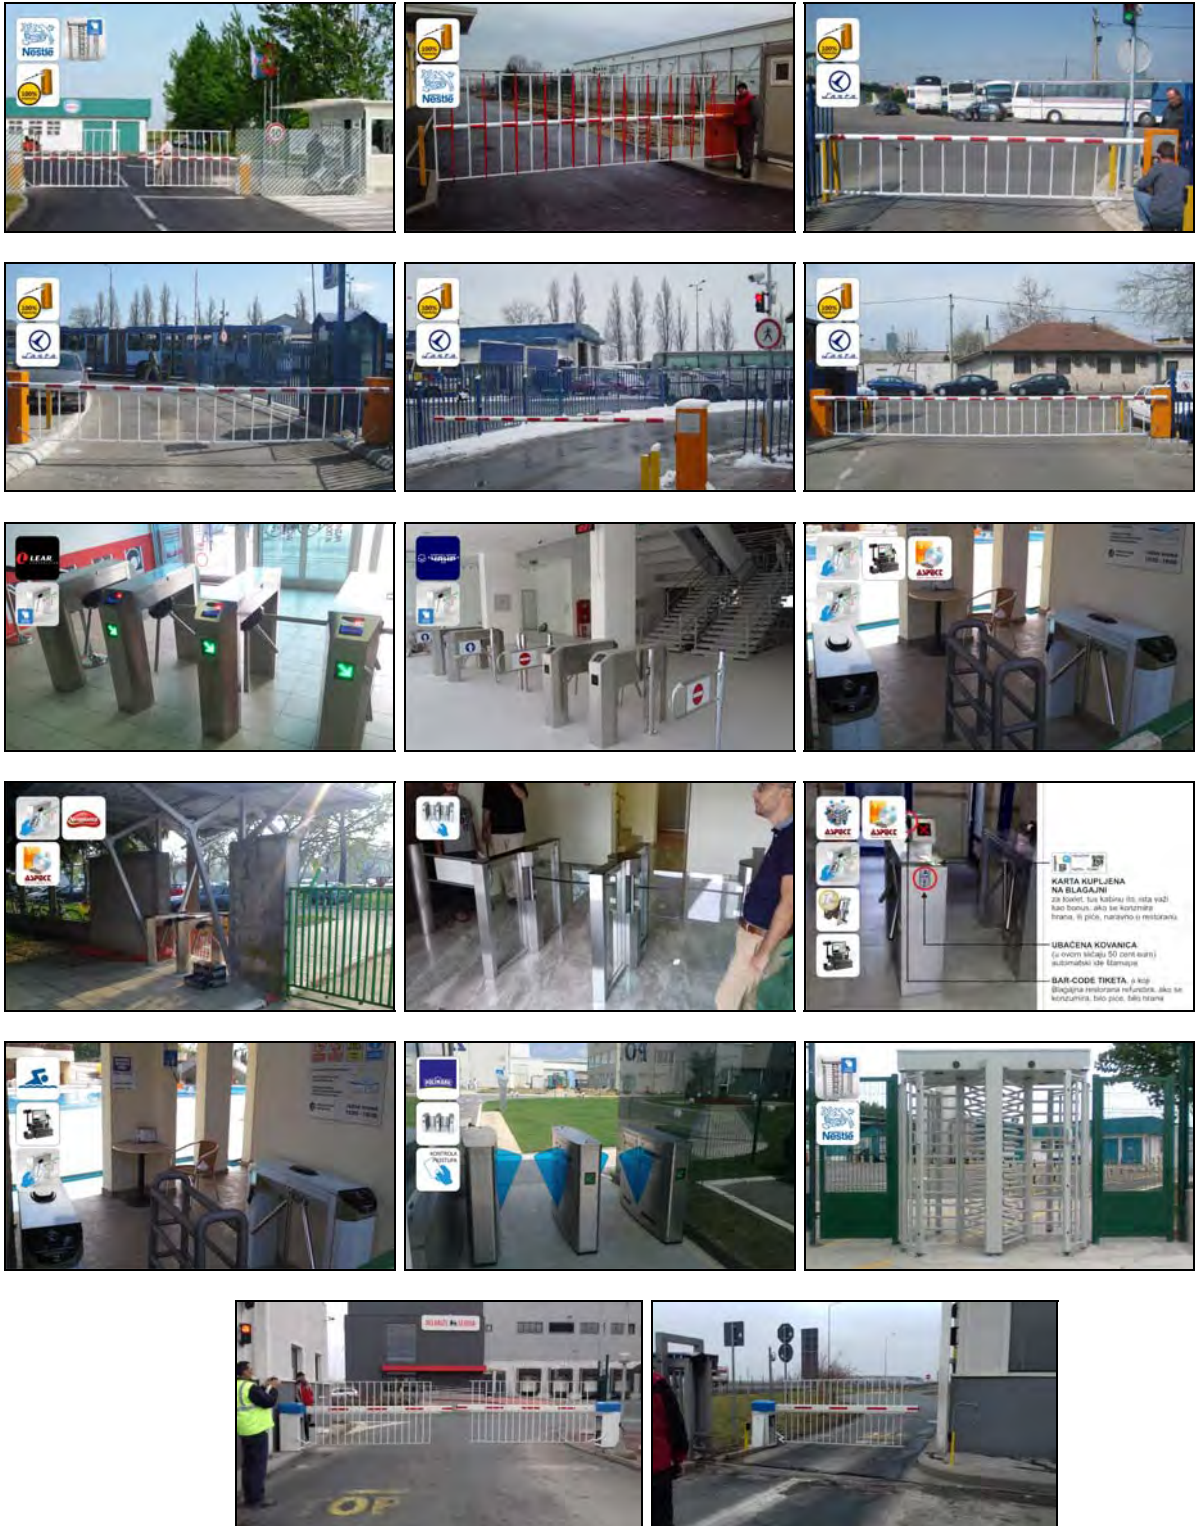

**Best regards,**
