

H-MF9 ENKODER

ID Kartica H-MF9 - formata Mifare 1K

U Pripremi.

Now that you picked the right RFID Card Lock System for your Hotel/Motels, Offices, Gyms, Multi-Dwelling Apartment Buildings, Nursing & Group Homes, and other Access Control applications. But what about how tell the Locks exactly how to behave to different keycards when swiped?

How Does This Machine Work?

This proprietary RFID Crad Encoder is your means of transferring and sharing data between your Front Desk PC and the Locks. Keep in mind that your Locks aren't wired back to your Front Desk PC. This proprietary Encoding Machine comes with a generic customizable Property Management Software (PMS) that performs functions like reservations, registrations, billing, Keycard Encryption (Issuing Valid Keycards) to guests, employees, elevators, doors and basic Point Of Sale functions. It comes with USB PC-Connectivity cable. Stores information to Card till overwritten
