

## BRAVICE ZA GARDEROBNE ORMARIĆE

CABINET LOCKS, Feb 2017.

### STANDARD - PUBLIC

## RAZLIKA

## DIFFERENCE

#### STANDARDNI REŽIM RADA BRAVICE ZA GARDEROBNE ORMARIĆE

- Bilo da su samo za RFID Kartice
- Bilo i da su za ŠIFRU i RFID Kartice

#### STANDARDNI REŽIM

Jedna bravica za garderobni ormarić autorizuje se za 1, ili i do 15 različitih RFID kartica, zavisi od odabranog modela.

Ne retko, ima modela bravica, a gde jedna RFID Kartica može da važi i za dve samostale bravice, naravno istog proizvođača.

#### “PUBLIC” REŽIM

Vrata garderobnog ormarića su OTVORENA. Korisnik ubaci svoje stvari, zatvori vrata, prinese svoju, bilo RFID Kartica, bilo Mag. Stripe ID Karticu, ili pak unese svoju ŠIFRU, bravica zabravi.

Naravno samo bilo ta RFID Kartica, bilo ŠIFRA mogu istu da otključaju, i naravno MASTER, uvek

#### STANDARD WORKING MODE FOR CABINET LOCKS (LOCKERS)

- For RFID Locks, only, or for
- RFID Cards and Keypad, as well

#### STANDARD MODE

One Cabinet lock can be authoreise for 1, or up to 15 RFID Cards, or CODEs, depend of lock model

Not rear, there are cabinet locks for which one RFID Cards can be valid for two standalone locks, identical producer, of course.

#### PUBLIC MODE

Cabinet door is opened, User put his belongings, close the door, “punch” his RFID Card or key CODE and lock is locked.

Of course, only that CARD, or CODE can unlock that particular lock, and MASTER Card, of course
