

ACCEPTOR FOR

# TOKENS, COINS

RFID TOKENS, FOR 1, 3, 4, OR 6 DIFFERENT, MADE IN SERBIA

## ONE-SHOT

### ACCESS CONTROL AND BILLING

- BUS, METRO, TRAIN Stations, Parking Lots,
- Sport's hales, swimming pools, SPA, wellness,
- Aqua parks, gaming machines, zoo parks, ...

*We do access control.  
Made in Serbia*

UNIVERSAL  
**TOKEN, COIN ACCEPTOR**  
MADE IN SERBIA

Doing access control for pedestrians and vehicles since 1996<sup>th</sup> we have experienced request from market for one simple, robust and efficient product, same time to be "plug and play" and "ready to integrate" to third party solutions as sub-system.

Idea we have started from was, some how to develop one UNIVERSAL housing for in door and desk top use, but for outdoor, as well and to fit to Parking lot column. What we have done.

One housing is stillness steel (inox) enclosure, 300x400x150mm, IP 68, K10 and perforated and prepared in our workshop, in manner to be ready for following:

**FOR IN DOOR USE**

Coin (token) acceptor for, 1, 2, 4, or 4 different types  
Mini semaphore, HELP Button, tamper,  
2 x relay, power supply 12VDC and 24VDC  
RFID Reader, if needed for time and attendance

**FOR OUT DOOR USE**

All previous, plus heater, fan, thermostats, 2 x grid with filters, canopy  
Assembled to our parking column made of anodized aluminium  
Dimensions 150x150x1200mm, thickness 5mm,  
Anchor plate, designed "not to be seen"

Pictures at the right illustrate various option we have done and implement, already.

As improvement we have developed one sub-system to fit on all previous and to monitor and control token acceptor if it is part of more complex system, what is not rare.

**EXAMPLES FROM OUR PRACTICE**

Below are two particular examples, one is touch screen command console for four pedestrian's lanes and for monitoring and control. Connected to tripod turnstile counters and count "passing", accepted tokens (coins) and RFID Cards, or RFID Tokens (valid for period), as well.

Second one is system assembled at tripod turnstiles and verify barcode "paper" ticket, and coins.

CC - Touch panel 4.3" color

Example: gas station, Pojate, Serbia, high way
